

Why Choose COS Systems for Your Open Access Network?

Running an open access network requires a partner with deep expertise, cutting-edge technology, and a commitment to your success. COS Systems offers all that and more, making it the ideal choice for operators looking to maximize efficiency, scalability, and profitability in a competitive market.

Here's why COS Systems stands out:

» Unmatched Expertise in Open Access Networks

- » With over 15 years of dedicated experience, COS Systems is a pioneer in developing software solutions specifically tailored for open access networks. Our flagship platform, COS Business Engine, is designed from the ground up to support True Open Access Networks, ensuring seamless operation where multiple service providers can thrive on shared infrastructure.

» Automation for Superior Efficiency

- » COS Business Engine excels in automating critical network operations, from zero-touch service provisioning to automated billing and customer self-service portals. This level of automation significantly reduces operational costs, minimizes human error, and enhances customer satisfaction by providing instant service activation and streamlined account management.

» Flexibility and Scalability Built-In

- » COS Business Engine is designed to grow with your network. Whether you're operating in a traditional telco model, wholesale, or an open access framework, our platform adapts effortlessly to different business models and market conditions. This flexibility ensures that you can scale your operations without the need for multiple systems, keeping your growth trajectory smooth and cost-effective.

» Maximize Revenue Potential

- » Our platform enables the creation of a dynamic marketplace where multiple service providers can offer a variety of services. This approach not only drives higher network utilization but also unlocks multiple revenue streams through wholesale fees and premium service offerings. Even in less densely populated areas, COS Systems makes fiber networks financially viable by ensuring maximum return on investment.

» Streamlined Support for Service Providers

- » COS Business Engine simplifies the onboarding process for service providers, allowing them to focus on what they do best—delivering high-quality services. By handling infrastructure and complex operations, COS Systems lowers the barriers to entry for new providers, fostering a competitive environment that benefits both operators and consumers.

» Enhanced Customer Experience

- » Customer satisfaction is at the core of COS Systems. Our platform includes features such as 24/7 self-service portals, automated ticketing systems, and proactive disruption notifications. These tools empower customers to manage their services independently, ensuring a superior customer experience that drives retention and loyalty.

» Proven Success and Global Adoption

- » COS Systems' software is trusted by hundreds of networks worldwide. Our robust integration capabilities with leading hardware providers like Nokia and Calix ensure that our platform not only meets but exceeds the needs of modern network operators. This proven track record underscores our commitment to your network's success.

» Data Integrity

- » COS Business Engine ensures data integrity with thousands of built-in validations and cross-checks that verify data accuracy at every stage, from data entry to service provisioning. Automated validation checks ensure correct address, service, and network element data, while real-time synchronization with network management systems keeps information up-to-date. The system's zero-touch provisioning reduces human error, and ongoing cross-checks prevent inconsistencies across customer accounts, service activations, and billing. Field operations, such as installation documentation, are also validated against live network data, ensuring a high level of operational reliability and data accuracy.

Why choose COS Systems

Choosing COS Systems means partnering with an industry leader who understands the complexities of open access networks and has the tools to help you succeed.

Our comprehensive, automated, and scalable solutions are designed to optimize your operations, enhance customer satisfaction, and maximize your revenue potential. With COS Systems, you are not just building a network—you're building the future of connectivity.

Let's connect and explore how COS Systems can empower your network to reach new heights. Contact us at sales@cosystems.com and learn more at www.cossystems.com
